

Minutes**FLOODRESC**

(Logistic support system for flood crisis management in the Hernád/Hornad catchment)

SKHU/1601/4.1/187

Venue: Technical University of Kosice, Kosice, Slovakia

Date: 20.09.2019. 10:00-12:00

Participants:

Jozefína Drotárová (VSBM)

Lucia Kováčová (VSBM)

Martina Vacková

Peter Losonczi (VSBM)

Peter Blistan (TUKE)

Eke Zoltán (BZ Nkft)

Kiss Levente (BZ Nkft)

Németh Róbert (TaF alapítvány)

Koczka Ivett (Holocén)

Kiss József (Holocén)

Dojcsák Dávid (BAZMKI)

Martina Zelenakova (TUKE)

Dr. Dobos Endre (UM)

Vágó János (UM)

10:00-10:30: Welcome speech from Peter Blistan (TUKE).

Dr. Endre Dobos (UM), the project leader gave a brief introduction on the aim of the meeting:
The main aim of the meeting is to discuss the details of TUKE conference and the information and publicity related issues of the project.

The TUKE has to organize a scientific conference in the last reporting period. The participants agreed on that the most appropriate date for the conference would be 21st of October. The logistical model is not fully completed yet, hopefully it will be finalized in early October, and therefore the conference could not be held earlier. According to the participants of the meeting all the major results of the project activities should be introduced at the conference, namely the development of GIS database, the EIA and DMP studies and the operational flood model and the logistical modeling application and their functions.

At the date of the conference the flood and logistical model tools and their GIS databases will be installed on a TUKE computer.

Information and publicity related tasks:

The consortium has to publish at least four scientific papers. The already published articles fulfill this criterion.

The consortium has to place 7 banners on their websites. 5 banners have been already placed at the partner institutions webpages, the remaining two will be placed on the University of Miskolc's subcontractors, who developed the two modeling tools.

At least 12 news must be published during the project, so far the consortium published 9 closing conference related news. The participants agreed on that further news will be published about the TUKE conference and the Closing conference.

The project website is available since the beginning of the project. The Kick-off meeting was organized at Miskolc in November, 2017.

The regular project meetings were held in the previous periods of the project. The VSBM organized its scientific conference in November, last year.

The press conference will be organized at the University of Miskolc on the day when the closing conference will be held at the end of October. The second press release will be published after the closing conference.

Press visits are also planned in the project, the TUKE and the University of Miskolc must provide a radio or TV interview as well.

At the closing conference small gifts (pendrives and notes with Floodresc logo) will be given to the participants.

All the partners placed the project posters at their institutions, the permanent plaques are already approved by the visibility manager of the project, these plaques can be made and placed in a minimum size of A3 at the institutions.

The minutes was compiled by János Vágó

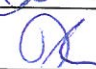

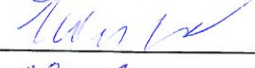

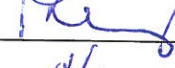

Endre Dobos
project manager

Attendance

Venue: Technical University of Kosice, Kosice

Date: 2019.09.20.
