

10.)

$I = 2A$ $d = 2cm$ \vec{H} a P_1, P_2, P_3 helyeken

Ampère-féle gerjesztési törvény:

$$\oint_G \vec{H} \cdot d\vec{s} = \sum I_i$$

végtelen egyenes vezetőre:

$$H \cdot 2R\pi = I$$

$$H = \frac{I}{2R\pi}$$

$$\vec{H} = \vec{H}_A + \vec{H}_B = 2\vec{H}_A$$

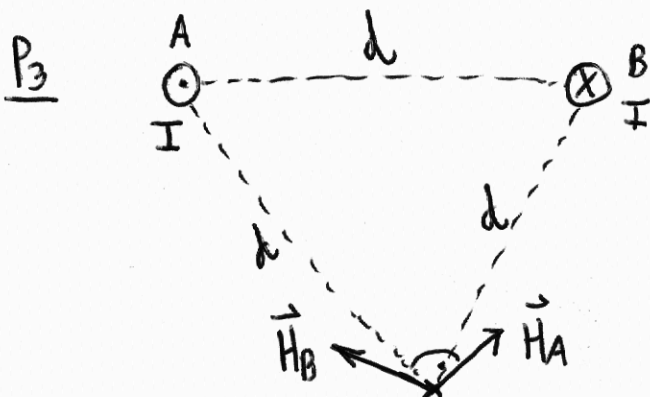

$$H_A = \frac{I}{2 \cdot \frac{d}{2} \pi} = \dots \quad H = \dots$$

$$\vec{H} = \vec{H}_A + \vec{H}_B$$

$$H_A = \frac{I}{2 \cdot 2d\pi} \quad H_B = \frac{I}{2d\pi}$$

$$H = \dots$$

$$H_A = H_B = \frac{I}{2d\pi}$$

$$\vec{H} = \vec{H}_A + \vec{H}_B$$

$$H = H_A \cdot \cos 60^\circ \cdot 2$$

$$H = \dots$$
